INDEX: VOLUME 21

AUTHORS AND SUBJECTS

Actions and outcomes 21:107–115.
Adjustment processes 21:295–319.
Affective and denotive meaning 21:69–85.
Aging treatment study 21:478–489.
Ambiguity characterization 21:19–25.
Avenhaus, Rudolf: see Jacques G. Gros.
Avoidance-joking 21:36–47.
Bargaining 21:161–172, 499–514.
Bargaining allocation 21:48–61.
Bargaining, bilateral monopoly 21:252–262.
Bayesian statistics 21:478–489.
Beck, Henry. Neuropsychological servosystems, consciousness, and the problem of embodiment. 21:139–160.
Behavioral variables and stress 21:469–477.
Bennett, Russell: see Svenn Lindskold.
Bertalanffy memorial lecture 21:207–218, 219–227, 228–239.
Bonoma, Thomas V. Conflict, cooperation and trust. 21:499–514. see Daniel Druckman.
Book Reviews:
Herbert, Theodore T. (Ed.). *Organizational Behavior: Readings and Cases*. (William Stallings, rev.) 21:548–549.
Kennedy, Alan, & Wilkes, Alan. *Studies in Long-Term Memory*. (Dennis H. Holding, rev.) 21:134–135.
Leik, Robert K., & Meeker, Barbara F. *Mathematical Sociology*. (Patrick Doreian, rev.) 21:202–203.
Norman, Donald A., & Rumelhart, David E. *Explorations in Cognition*. (John A. Robinson, rev.) 21:64–66.
Nowakowska, Maria. *Language of Motivation and Language of Actions*. (E. Taschdjian, rev.) 21:62–64.
Rubinstein, Moshe F. *Patterns of Problem Solving*. (Joseph M. Petrosko, rev.) 21:200–202.
Simpson, Douglas B., & Podsakoff, Philip M. *Workshop Management: A Behavioral and Systems Approach*. (Anthony M. Gamboa, Jr., rev.) 21:290–291.
Weinberg, Gerald M. *An introduction to general systems thinking*. (William Stallings, rev.) 21:289–290.
Borda rule 21:1–12.
Brandes, Barbara: see Marc Pilisuk.
Buckingham, Sandra: see C. S. Holling.
Burton, Richard M., Damon, William W., & Dellinger, David C. Estimating the impact of health services in a community. 21:478–489.
Carroll, Thomas M.: see Robert J. Wolfson.
Channel and net 21:219–227.
Channel capacity theorem 21:490–498.
Choice behavior 21:19–25.
City population change 21:263–273.
Clique algorithms 21:26–35.
Clustering 21:36–47.
Coalition formation 21:48–61, 161–172.
Cognition 21:128–133, 228–239.
Cognitive structures 21:69–85.
Collective action 21:101–106.
Collective goods 21:101–106.
Community health services 21:478–489.
Componential analysis 21:69–85.
Computer program, interactive 21:173–182.
Concession rates 21:252–262.
Conciliatory strategy 21:13–18.
Condorcet choice 21:101–106.
Conflict resolution 21:13–18, 26–35, 252–262, 515–523.
Conflict theory 21:499–514.
Consciousness 21:139–160.
Cooperation and competition 21:86–100, 515–523.
Cooperation and trust 21:499–514.
Critical subsystems 21:219–227, 295–319.
Cross-cultural methodology 21:69–85.
Damon, William W.: see Richard M. Burton.
Decision/expectation/adjustment 21:252–262.
Decision making 21:173–182, 240–251, 524–531.
Decision processes 21:107–115, 116–127.
Decision theory, collective 21:532–547.
Dellinger, David C.: see Richard M. Burton
Doreian, Patrick: see book reviews, Robert K. Leik & Barbara F. Meeker.
Druckman, Daniel, & Bonoma, Thomas V. Determinants of bargaining behavior in a bilateral monopoly situation II: Opponent's concession rate and similarity. 21:252–262.
Ecosystem behavior 21:183–195.
Ego involvement 21:532–547.
Emotional behavior, mice 21:469–477.
Estimating clinical judgment 21:478–489.
Facet theory 21:469–477.
Fishburn, Peter C., & Gehrlein, William V. An analysis of simple two-stage voting systems. 21:1–12.
Gamboa, Anthony M., Jr.: see book reviews, Douglas B. Simpson & Philip M. Podsakoff.
Games, decision making 21:19–25.
Games, three-person 21:48–61, 161–172.
Gehrlein, William V.: see Peter C. Fishburn.
General living systems theory 21:219–227, 295–319, 320–468.
General systems theory 21:207–218, 228–239.
Generality and specificity 21:469–477.
Glassman, Robert B. A neural systems theory of schizophrenia and tardive dyskinesia. 21:274–288.
Grinker, Roy R., Sr. In memory of Ludwig von Bertalanffy's contribution to psychiatry. 21:207–218.
Grinold, Richard C., & Weyant, John P. The transition fractions in organizational manpower planning models. 21:240–251.
GRIT strategy 21:13–18.
Group decision making 21:532–547.

Gros, Jacques G., Avenhaus, Rudolf, Linnerooth, Joanne, Pahner, Philip D., & Otway, Harry J. A systems analysis approach to nuclear facility siting. 21:116–127.
Groups 21:48–61.
Guttman, Louis, & Guttman, Ruth. A theory of behavioral generality and specificity during mild stress. 21:469–477.
Guttman, Ruth: see Louis Guttman.
Hage, Per. Structural balance and clustering in bushmen kinship relations. 21:36–47.
Hardin, Russell. Group provision of step goods. 21:101–106.
Hart, Edward H., & Sung, Yong H. Computer and experimental simulation of triad decision making. 21:532–547.
Heil, Gregory H., & White, Harrison C. An algorithm for finding simultaneous homomorphic correspondences between graphs and their image graphs. 21:26–35.
Holding, Dannis H.: see book reviews, Alan Kennedy & Alan Wilkes.
Holling, C. S., & Buckingham, Sandra. A behavioral model of predator-prey functional responses. 21:183–195.
Homomorphic graphs 21:26–35.
Howard, Nigel. Prisoner's dilemma: The solution by general metagames. 21:524–531.
Huang, C. C., Mueller, D., & Vertinsky, I. Urban systems dynamics: A comparative static analysis of system sizes with some policy implications. 21:263–273.
Human information processing 21:128–133.
Human load components 21:490–498.
Hypotheses, living systems 21:295–319.
Ignorance and error, 21:107–115.
Illicit communication 21:515–523.
Image graph algorithms 21:26–35.
Indifference curves 21:86–100.
Information deficiency 21:107–115.
Input overload 21:320–468, 490–498.
Interdependent preferences 21:86–100.
International adjustment processes 21:320–468.
International relations 21:320–468.
Interpersonal relations 21:36–47.
Isomorphisms 21:207–218.
Kearsley, Gregory P. A simulation model of psychological epistemology: METO, EMPO, and RATIO. 21:128–133.
Keeney, Ralph L., & Sicherman, Alan. Assessing and analyzing preferences concerning multiple objectives: An interactive computer program. 21:173–182.
Kinesics 21:139–160.
Kinship relations 21:36–47.
Knowledge structures 21:128–133.
Lindskold, Svenn, Bennett, Russell, & Wayner, Marc. Retaliation level as a foundation for subsequent conciliation. 21:13–18.
Linnerooth, Joanne: see Jacques G. Gros.
Living systems 21:207–218, 295–319, 320–468.
MacCrimmon, Kenneth R., & Messick, David M. A framework for social motives. 21:86–100.
Manpower model 21:240–251.
Medlin, Steven M. Effects of grand coalition payoffs on coalition formation in three-person games. 21:48–61.
Messick, David M.: see Kenneth R. MacCrimmon.
Metagame theory 21:524–531.
Miller, James G. Living systems: The supranational system. 21:320–468.
Miller, James G. The nature of living systems. 21:295–319.
Miller, James G. Second annual Ludwig von Bertalanffy memorial lecture. 21:219–227.
Minimum resource theory 21:161–172.
Misinformation cost 21:107–115.
Model, computer manpower 21:240–251.
Model, mathematical 21:263–273, 478–489, 524–531.
Model, population change 21:263–273.
Model, prey-predator 21:183–195.
Model, simulation 21:128–133, 183–195.
Mueller, D.: see C. C. Huang.
Multiple objectives 21:173–182.
Neuroleptics 21:274–288.
Neuropsychology 21:139–160.
Nitz, Lawrence H. Resource theory and ameliorative strategy in a minimal information political convention game. 21:161–172.
Nongovernmental organization 21:320–468.
n-person game theory 21:524–531.
Nuclear facility siting 21:116–127.
Objective complexity of work 21:490–498.
Oliva, Terence A. Laszlo, semantics, and systems definitions: A critique. 21:196–199.
Opponent similarity 21:252–262.
Organizational planning 21:240–251.
Osgood, Charles E.: see Oliver C. S. Tzeng.
Otway, Harry J.: see Jacques G. Gros.
Pahner, Philip D.: see Jacques G. Gros.
Paretian analysis 21:116–127.
Parity-equity norms 21:161–172.
Payoff distribution 21:48–61.
Personnel fractional flow 21:240–251.
Petrosko, Joseph M.: see book reviews, Moshe F. Rubinstein.
Philosophy of science 21:228–239.
Pilisuk, Marc, Brandes, Barbara, & van den Hove, Didier. Deceptive sounds: Illicit communication in the laboratory. 21:515–523.
Population change models 21:263–273.
Power systems 21:499–514.
Predation 21:183–195.
Preferences 21:173–182.
Prisoner's dilemma 21:101–106, 515–523, 524–531.
Psychiatry 21:207–218.
Psychological epistemology 21:128–133.
Psychophysiology 21:139–160.
Qualitative functional forms 21:183–195.
Rapoport, Anatol. General systems theory: A bridge between two cultures. Third annual Ludwig von Bertalanffy memorial lecture. 21:228–239.
Reciprocity 21:13–18.
Retaliation 21:13–18.
Robinson, John A.: see book reviews, Donald A. Norman & David E. Rumelhart.
Schizophrenia 21:274–288.
Scientific analogy 21:228–239.
Semantics 21:69–85.
Shred out 21:219–227.

Sicherman, Alan: see Ralph L. Keeney.
Signaling intentions 21:515–523.
Simple majority 21:1–12.
Simulation, computer 21:1–12.
Simulation, computer model 21:532–547.
Site-facility selection 21:116–127.
Smallest space analysis 21:469–477.
Social choice 21:86–100.
Social interaction 21:499–514.
Social judgment theory 21:532–547.
Social motives 21:86–100.
Social networks 21:26–35.
Stallings, William: see book reviews, Theodore T. Herbert; Gerald M. Weinberg.
Step goods 21:101–106.
Structural balance 21:36–47.
Structure and process 21:295–319.
Subjective second order probability distributions 21:19–25.
Sung, Yong H.: see Edward H. Hart.
Systems 21:274–288.
Systems science 21:139–160, 320–468.
Tardive dyskinesia 21:274–288.
Taschdjian, E.: see book reviews, Maria Nowakowska.
Task entrophy 21:490–498.
Two-stage voting systems 21:1–12.
Tzeng, Oliver C. S., & Osgood, Charles E. Validity tests for componential analyses of conceptual domains: A cross-cultural study in methodology. 21:69–85.
Urban systems dynamics 21:263–273.
Utility function 21:173–182.
Utility function, multiattribute 21:116–127.
van den Hove, Didier: see Marc Pilisuk.
van Gigch, John P. The physical and mental load components of objective complexity in production systems. 21:490–498.
Vertinsky, I.: see C. C. Huang.
Voting system efficiency 21:1–12.
Wayner, Marc: see Svenn Lindskold.
Weyant, John P.: see Richard C. Grinold.
White, Harrison C.: see Gregory H. Heil.
Wolfson, Robert J., & Carroll, Thomas M. Ignorance, error, and information in the classic theory of decision. 21:107–115.
World models and simulations 21:320–468.
